first actuarial

Helping Trade Unions

Services to trade unions

Services supporting trade union members

Services to trustees of trade union staff pension schemes

Why First Actuarial?

We are the leading provider of pension services to the trade union movement – over the years we've advised more than half of today's TUC affiliates.

First Actuarial works with trade unions to provide policy advice, consultation responses and negotiation support.

We provide Scheme Actuary and pension scheme administration services to 10 trade union staff pension schemes with assets between £10 million and £1 billion.

We also deliver services directly to trade union members. Our Financial Wellbeing programmes help people make sense of change, and give them the confidence they need to make informed choices.

We produce quarterly trade union briefings, highlighting and discussing the hot pension topics of the day. And we also provide benchmarking services, comparing trade unions on a range of measures, relevant to pensions.
